22. The method claimed in claim 1, wherein one of the data bases is the
National Name and Address Data Base.

B16

In the Abstract:

Abstract Of The Invention

A method that enables the post to deliver letters, flats, post cards and packages (mail) addressed to a recipient's virtual post office box and then to be delivered directly to the recipient. The process enables individuals or entities to rent a virtual post office (VPO) box i.e., a box that does not physically exist, from the post office ("post"). Mail addressed to the virtual post office box would be captured by the post during the post's sortation process and rerouted to the specified address of the renter of the virtual post office box.
